

MachineWatch[®]

- › Simple to Install
- › Maintenance-free
- › Robust and Reliable
- › Comprehensive Cloud-Based Solution

MachineWatch®

Use MachineWatch to prevent catastrophic failures, reduce oil consumption, improve predictive maintenance programs, and optimize fleet performance. Key monitoring parameters include:

OIL WEAR

MOISTURE IN OIL

WEAR METALS

TEMPERATURE

Integrated, Accessible, No Calibration Required

Mechanical Integration

Convenient Installation. Swap the oil drain plug with the Oil Advantage sensor which installs precisely into the oil pan/reservoir of the equipment to be monitored - no need for bypass pumping

Electrical Integration

Easy Availability. Our products run off 9V – 28V DC power and draw a maximum of 100mA. Two wires run from the DAU and can be connected to any suitable power source.

Access data your way

- **Onboard Telematics.** Hard-wired connection from MachineWatch to your gateway.
- **Cloud-to-Cloud.** Use our integrated telematics and an API to connect to your cloud.
- **End-to-End Solution.** Direct access to our cloud solution, with a dashboard dedicated to your operation.

MachineWatch reduces the cost and eliminates the complexity of other oil monitoring solutions. Our devices install directly to your existing oil reservoir, eliminating the need for additional plumbing, pumps or maintenance. And, they are built to last the lifetime of your equipment.

Contact us today to learn how our sensors can save you time and money.
